Appendix L
Product Codes

The product code uniquely identifies and tracks the various products obtained from Federal and Indian leases. This code is used on the OGOR-C. Oil and gas product code assignments are shown below:

Code	Product code name	Description
01	Oil Oil/ Condensate	A mixture of hydrocarbons that existed in the liquid phase in natural underground reservoirs and remains liquid at atmospheric pressure after passing through surface separating facilities and is marketed or used as such. Condensate recovered in lease separators or field facilities is considered to be oil. For purposes of royalty valuation, the term "tar sands" is defined separately from oil.
02	Condensate	Liquid hydrocarbons (normally exceeding 40 degrees of API gravity) recovered at the wellhead without resorting to processing. Condensate is the mixture of liquid hydrocarbons that results from condensation of petroleum hydrocarbons existing initially in a gaseous phase in an underground reservoir.
17	Carbon Dioxide	A colorless, odorless gaseous compound of carbon and oxygen (CO_2). Report this product **only** on OGOR-C with approval from BLM (onshore). Not valid for offshore.
